DID YOU KNOW?

The city of bridges and canals

There are 417 bridges in the historic city. Of these 300 are stone built, 60 in iron and the remaining 57 are made of wood. The last bridge was built to connect the bus station Piazzale Roma with the railway station and was designed by the Spanish architect Santiago Calatrava. In ancient times the bridges of Venice had no steps because up to the 1500s it was allowed to go on horseback. There are only two bridges in Venice without sides or balustrades: the first is in Torcello island and is called Ponte del Diavolo; the other one you can see along the Rio di San Felice near the Scuola Grande della Misericordia. The narrowest alley in Venice is called Calletta Varisco and is located near Campo San Canciano: it has a width of only 53 centimeters.

JESOLAN FLAVORS

Tiramisù

Dish made in the aftermath of the Second World War whose name (pick me up) refers to the calorie content.

600 g mascarpone - 300 g sugar - 6 egg yolks - ladyfingers - cold unsweetened coffee - unsweetened cocoa (to taste)

Beat the egg yolks well. Mix the mascarpone and sugar and add the mixture to the egg yolks to obtain a thick, smooth mixture. Soak the ladyfingers in the coffee and arrange them in a dish (oven dish/glass) and cover them with the cream. Continue arranging alternating layers until the cream is finished. On the last layer, which should be the cream, dust with cocoa and refrigerate for a couple of hours.

JESOLO AND AROUND

The botanical garden in Padua

The botanical garden in Padua was founded in 1545 and is the world's oldest university botanical garden. This natural and architectural wonder houses nearly 7,000 plant species, a unique variety of specimens recognized by UNESCO as a World Heritage Site in 1997. Most of the world's known species are kept here and educational workshops aimed at schools and groups of students and adults take place here, divided into 10 thematic routes. Anyone who chooses to spend an hour or two in the Botanical Garden - particularly suited for family visits - should not miss out on seeing the historic trees. Among them is the *Chamaerops humilis* palm tree from 1585, an oriental banana tree from 1686 and a magnolia from 1796, the oldest in Europe. There are also medicinal plant and carnivorous plant sectors and a corner where entire ecosystems are rebuilt, such as the tropical greenhouse or the Mediterranean scrub. They are all worth a visit.
